

DE DELL SEEDS
INCORPORATED

To Whom It May Concern,

De Dell Seeds is a 100% Non-GMO seed corn company. We do not believe that you need biotechnology to grow a good crop of corn and have a track record of success to prove it! In addition to our Non-GMO corn we also sell organic seed corn.

The following list of hybrids are the ones we had for sale the 2025 growing season organically.

- DL 928
- DL 2866
- DL 3007
- DL 3655
- DL 3808
- DL 3905

If for some reason a customer could not use one of the organic hybrids offered, we could have provided them with Non-GMO untreated seed to suit their needs. If that were the case, the untreated seed was provided bare yellow, without any seed treatment on it whatsoever.

This letter combined with the appropriate seed tag acts as the Non-GMO and Untreated Statement for our 2025 hybrids.

If you have any questions or concerns feel free to contact us.
